March 2018

It's all in the Details

This month's membership meeting will be held at the shop of Greg Zall in Petaluma. Greg plans to discuss parquetry, which is a veneering technique that is more linear, compared with Greg's better known skill, marquetry. Parquetry involves making decorative patterns by using primarily squares, triangles, and diamond shapes.

He plans on a discussion of the concepts, followed by a demonstration. Samples of parquetry work as well as slides of examples of parquetry work will be shown.

He will also have a large marquetry project in the shop for our meeting. The timing is perfect, because the nearly completed project, a Torah Cabinet, is due to be installed in its permanent home, a synagogue, very soon.

The meeting is on March 6, 2018. Starts at 7pm. Bring a chair if you plan on sitting.

Where: Greg Zall's Shop
1890 Middle Two Rock Road
Petaluma, Ca 94952

Directions: From Highway 101, take the East Washington St. exit and head west on Washington towards Bodega. A mile out of town you will see the well marked sign for Middle Two Rock Road. Take a left. In a mile you will see a well marked sign for 1890 (opposite the end of Eastman Lane). Turn right and proceed down the long driveway. Near the bottom you will see a some old chicken coops. Greg's is the one on the right, closest to the cows.

Phone numbers, should you need them:

cell: 707 761 3494

shop: 707 762 6106

Arbor Day March 7

California's Arbor Day is celebrated on March 7, in honor of renowned horticulturist Luther Burbank's birthday (March 7, 1849-April 11, 1926).

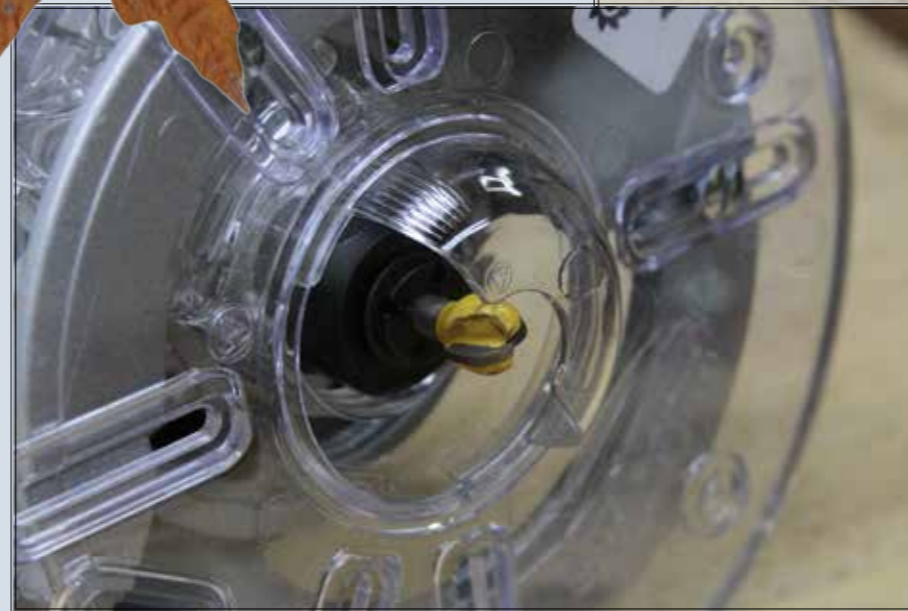

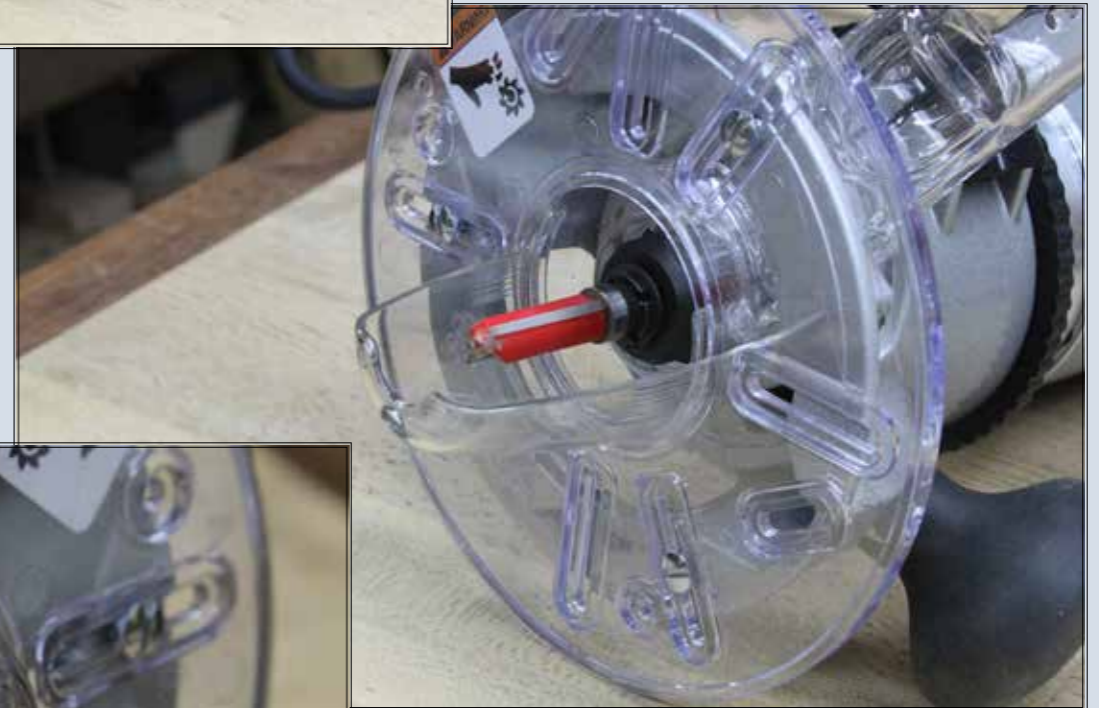

Another reason we need more trees

Tool Review

Oneida Air Systems, maker of the excellent line of dust collection components, has addressed the unique problem of chip/dust collection from portable routers. Their system consists of a two-piece base that is substituted for the OEM base. The base has several hole patterns to accommodate most of the common routers on the market, and machine screws are included. A swiveling pickup neck for your hose connection is attached to the base. Two rotating shrouds are included that snap into the underside of the base. One is sized to fit short bits; the other is for

longer bits such as used in pattern routing. Together with the topside hood, virtually *nothing* escapes the vacuum. By detaching the bottom shroud, grooves and mortises can be made. All in all, a great addition to the bench.

Wood Forum is the monthly newsletter of the Sonoma County Woodworkers Association. Please feel free to submit articles and photographs for inclusion in the publication. You can send your submissions to the Wood Forum Editor at SCWAEditor@gmail.com. Advertisements are also accepted with a nominal cost for paid members.

Membership Application

I would like to join the SCWA to meet other people interested in the craft, the art and the business of fine wood-working. Enclosed is my check in the amount of \$35 for the annual dues. I understand that this fee entitles me to attend monthly meetings and to receive the Wood Forum newsletter by email or via the SCWA's website.
